

Application for Membership in the Florida Association of Science Teachers

FAST Members: Who are we?

We are a diverse group of teachers, scientists, science educators, science supervisors, curriculum designers, administrators and educational business partners who have a common goal of improving education for students in the state of Florida.

What are the benefits of a FAST membership?

FAST provides a way for all members to keep up with what's happening in education in Florida and across the United States.

Information is provided to members through two publications and by communicating with our area and grade level representatives. Our award winning FAST Journal and our Newsletter provide information on professional development, grant opportunities, curriculum updates, awards and our upcoming convention.

We give members a voice at the national level as the Florida affiliate of NSTA (the National Association of Science Teachers).

The board members represent teachers by serving on a variety of educational boards, committees, and panels that shape the educational policy in Florida. Your voice can be heard by letting your representative know how you feel about Florida's educational policies. There is a board member for each geographical area and one for each educational group (elementary, middle, high and informal educators).

Members can nominate their peers for awards, apply for grants and opportunities and attend our annual conference that features a "trade fair", dynamic presentations, hands on workshops and general membership meeting where teachers hear reports from board members and share ideas related to the direction of education in Florida.

For more information go to our website:

<http://www.fastscience.org/>

We are looking forward to hearing from you.
